

When a new positive person according to the age of the Metropolitan area is seen, less than 29 years old are about 50 % of the whole.

Infection occupies it and spreads mainly by a young person.

You yourself and the important family and, in the purpose which doesn't expand infection into my friend

It's important to work on a daily infection measure tightly.

I'll check it before going out.

Does the time of physical condition badness (For fever's and a cough's having a sore throat.) cut down going out?

If the symptom is felt, will you have a medical clinic immediately?

Even if there are no symptoms, do you know to move to the others?

① Alcoholic party (including home drinking and outdoor barbecue, etc.)

â-j Does all except for the eating and drinking time carry mask wear without exception?

â-j Has the distance between the person and the person been secured?

â-j A short time and a small number of people?

Are you ventilating by window opening and a range hood (in case of home)?

② They're drives, I have moved.

Even during having moved, is wear of a mask carried without exception?

â-j (When it's possible to ventilate.) are you ventilating by window opening?

Has the distance between the person and the person been secured?

③ Market share house student dormitory

â-j Is a mask worn at any place but its own room (sharing space)?

â-j Is a room being ventilated?

â-j A room is put in order, and has an aerial way been secured?

â-j Do you have a hand finger disinfectant at the appropriate place (on the line of flow and the place where you catch attention)?

④ Group activities and club activities

Every time training machinery and materials of sharing and equipment are used, is it being sterilized?

Is a mask worn by a situation of all except for except for except for during practice (at the time of rest)?

Does a meeting be paying attention to the distance with the person and ventilation and be going by a short time?

Are there a hand finger disinfectant and environment that I can hand wash in practice and an arena?

To avoid mitsu, is a locker room doing the use and the ventilation sorted from time?

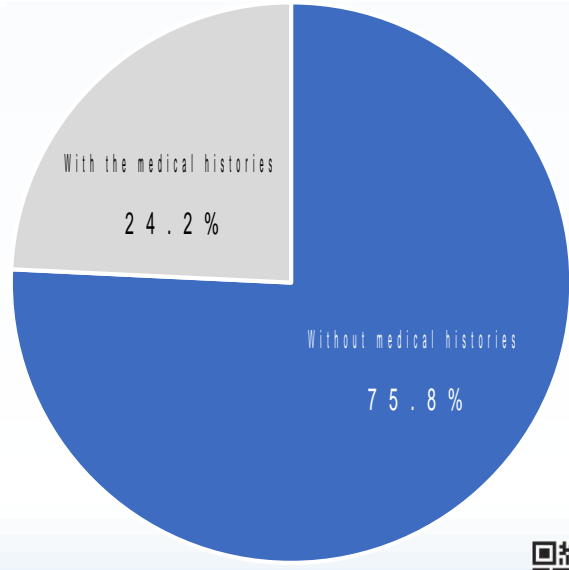

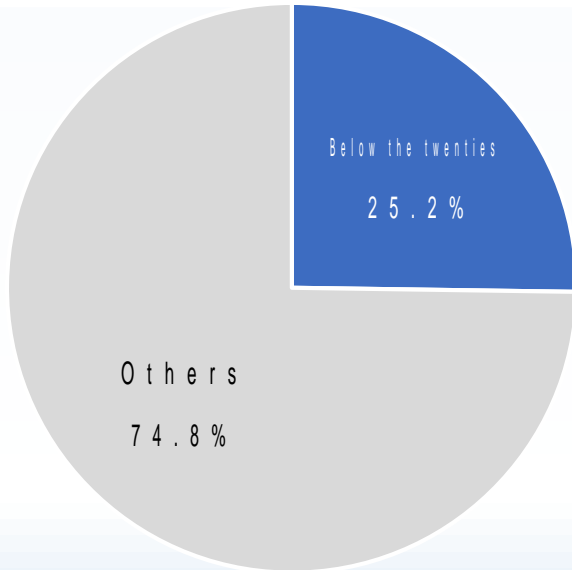

A young person and a healthy person. **Aftereffect** It isn't irrelevant.

'Corona aftereffect consulting counters' a one.

Over the person who wants to have counselling

1 person for 4 people of person who wants to have counselling is below the twenties.

"The person who doesn't have a medical history" but 3 people for 4 people

'Corona aftereffect consulting counters' in metropolis and a public corporation hospital

I'll consider vaccination.

It's the 3rd time of vaccination to stop worsening of condition after infection and infection.

If a vaccine is inoculated.

It's registration in TOKYO frame-tion Application.

The look Talk Window The must

â- The consultation destination where I'd like to know Corona isn't understood.

New-style Corona omicron stock call center 0570-550-571

â- I'd like to receive free PCR test.

Capital PCR makes a check free, business secretariat call center 03-4405-4958

â- Heat was generated, how will you do?

- (1) First it's a contact in a family doctor.
- (2) Medical care and medical examination medical clinic (the way with the symptom where it's for fever)
- (3) Tokyo fever consultation center (the way with the symptom where it's for fever)

03-6258-5780 or 03-5320-459203-6630-3710 (medical clinic information exclusive use)

Medical care and a medical examination medical clinic map are this.
